## **New Fuel Screen STC for Cessna 180, 182 (early), 210, 210A and 185**

STC No. SA02221AK for our new design replacement fuel screens that fit in the fuel bladders for Cessna 180's, early model 182's, and all 185's was issued February 2005

These new replacement fuel screens are fabricated from a single piece of aluminum tubing that has the screen drilled into the side walls. After deburring and cleaning, the end is spun shut.

**This design allows a 3 GPH higher fuel flow rate over the original part.** In addition, because our fuel screen design is a single piece it is stronger and easier to install, without fear of bending, cracking or breaking of the screen portion.

### **Part Number**

BAR0720000-69

**\$300.00 each**

### **Aircraft Model Applicability**

180 Series S/N 30000 through 18051063

182 Series S/N 33000 through 18253598

210 Series S/N 57001 through 57575

210A Series S/N 57576 through 57840

BAR0720007-7 (Aft)

**\$300.00 each**

180 Series S/N 18051064 and up

185 All S/N's

BAR0720007-9 (Front)

**\$300.00 each**

180 Series S/N 18051064 and up

185 All S/N's

Installation instructions and ICA (Instructions for Continued Airworthiness) include a table listing the complete cross-reference for original part numbers to the replacement part numbers.
